
Ruize Chen

Undergraduate Student, School of EECS, Peking University

Email: legitimacy233@gmail.com | GitHub: github.com/Legitimity | Website: legitimacy.github.io

Research Interests

- Efficient AI systems, training acceleration, and architecture optimization.
- Machine Learning and LLM pre-training/post-training methodologies.
- Approximate algorithms and advanced data structures.

Education

Peking University — B.S. in Information and Computing Science (Expected Jun 2029)

Academic performance (through Spring 2026): weighted average **91.38/100** across **51** graded credits; overall GPA **3.84/4.00** (P/NP excluded, credit-weighted).

Selected coursework:

- Fundamentals of Artificial Intelligence
- Intermediate Algorithms and Applications
- Mathematical Analysis I / II
- Advanced Algebra I / II

Honor Track grades: Practice of Programming in C&C++; (98); Introduction to Computing A (91).

Research & Project Experience

Tencent Spark Challenge — nanoGPT Speedrun | Project Lead / Core Developer | Aug 2026

- Evolved nanoGPT GPT-2 baseline into a ~170M Dense Speedrun model under a 4-hour wall-clock budget.
- Implemented fused QKVG projection, 1-bank Value Embedding, and ReLU² FFN to improve throughput and convergence.
- Designed WSD scheduling strategy and achieved final validation loss **3.005883**.

Guobiao Mahjong AI (Fundamentals of AI Course Project) | Core Developer | Spring 2026

- Built a ResNet-based supervised model using 98,209 expert self-play matches.
- Developed lazy-loading + in-worker LRU cache + locality-aware sampler to remove CPU/IO bottlenecks.
- Implemented online 12x symmetry augmentation; reached **88.18%** masked accuracy and stable Top-5 Botzone ranking.

Honors & Awards

- Team Representative, ICPC Asia Nanjing Regional Contest (2025)
- Gold Medal, NOI Winter Camp (NOI WC)
- Gold Medal, NOI Summer Camp (NOI D)
- Silver Medal, National Olympiad in Informatics (NOI)
- Silver Medal, Asia-Pacific Informatics Olympiad (APIO 2023)

Technical Skills

Programming: C/C++, Python | Frameworks: PyTorch | Tools: Linux/Ubuntu, Git, GitHub Actions |

Languages: Mandarin (Native), English (Proficient)
